

# A Rapid Response to MiFID

Proven experience, knowledge base, tool kit, and partnership resources. Your guide to a successful MiFID implementation with MPI Europe

The MPI Europe (MPIE) **Rapid Start for MiFID** solution, as the name suggests, is designed to help firms who have just started their MiFID projects or otherwise need assistance to make rapid progress towards meeting their specific requirements. With proven MiFID implementation experience, we are ready to help you achieve a pragmatic solution to the key issues. MPIE have a unique mix of tools, techniques and expertise (developed and enhanced on client projects) plus experienced resources to assist clients to address this challenge. We also have access to leading MiFID thinkers through our wider associate network.

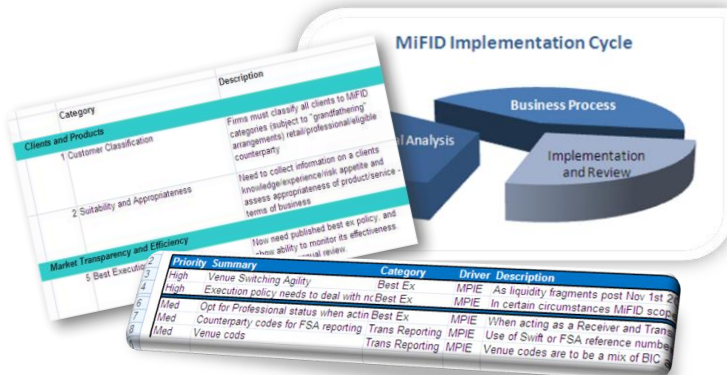

## **The Rapid Start for MiFID Solution**

The proven materials, built from pragmatic client MiFID project experience, include:

- Category structure to help understand the different MiFID requirements and help promote completeness of the solution
- Proven issues list framework that comes pre-populated with a common set of MiFID issues organised by Category
- Implementation papers summarising analysis of requirements in some of the key implementation areas such as Transaction Reporting and Reference Data
- Reference list with links to a myriad of MiFID sources
- Template Project Plans

Plus much more supporting material

# MIFID AND YOUR BUSINESS - A RAPID RESPONSE

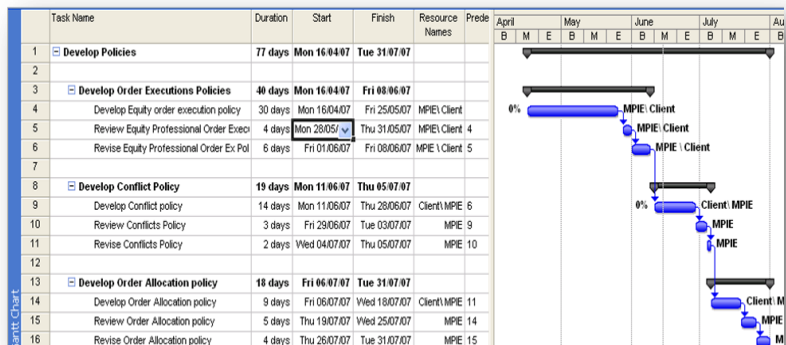

## Our MiFID update service

Rather than asking you to bear the full cost of keeping up to date with the latest documents, research and thinking MPIE provide a low cost mechanism of sharing the cost between several MiFID projects without significantly reducing the quality of the information we provide. For example, the materials specified above will receive regular updates via this MiFID update

service as your project progresses. The MPIE project manager will ensure that their application is suitably customised to your specific needs. The MiFID Update Service uses research done in support of all our MiFID initiatives and involves active research, attendance at events, discussions with key market players and subscriptions to news feeds as well as desk and web research.

## Proven Project Structure

As part of our proven project approach, we run a weekly Steering Group meeting to engage with the relevant client management as a forum for reporting progress, determining key decisions and priorities and to air and resolve issues. Our Managing Director, an acknowledged MiFID expert and former KPMG Consulting Partner with expertise including running the MiFID programme for a well known London based investment bank, will attend these meetings each week and will be available on an ad-hoc email and phone *out of hours* basis via the MPIE project manager to answer specific questions. We will also include an allowance for assistance by MiFID experts available on an ad-hoc basis from the MPIE associate network.

## Experienced Project Manager

MPIE will provide an experienced project manager on a full-time basis to help your staff manage this important project. This manager will have extensive experience in implementing financial sector projects. We can also provide business analysts and other resources to supplement your internal team.

**Contact us...** for further details of additional benefits MPIE could bring your business or a discussion on how we can help you get your MiFID programme off the ground
