

Assessment Approach

- *Cross regulation control, management and compliance first requires documentation, assessment and monitoring*
- *MPI Europe with partners have developed an approach combining consulting, software and intellectual capital to address this area covering over 1000 topics encompassing twelve key risk categories*
- *The approach allows data to be collected, reported and analysed electronically starting from a small pilot to cover the whole enterprise*
- *The tools and techniques link to issue management and workflow to allow the control and management of the compliance process*
